) DOCKET FILE COPY ORIGINAL

RECEIVED

AUG 20 1996

FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF SECRETARY

**PETITION FOR RULE MAKING**

Comes now **Connoisseur Communications of Quad Cities, L.P.** ("Petitioner"), by Counsel, and pursuant to Section 1.401 of the Commission's Rules, hereby respectfully petitions the Commission to amend Section 73.202(b) of the Rules, FM Table of Allotments, as follows:

<i>Community</i>	<i>Present</i>	<i>Proposed</i>
Geneseo, Illinois	285A	----
DeWitt, Iowa	----	285C3

In support whereof, the following is shown:

***Background***

1. Petitioner is the Licensee of Radio Stations WGEN (AM) and WGEN-FM, Geneseo, Illinois<sup>1</sup>. Radio Station WGEN-FM is presently authorized to operate on Channel 285A. Petitioner seeks to have the Commission amend the FM Table of Allotments to permit an upgrade of the present allotment to a Class C3 facility, and to change WGEN-FM's community of license to DeWitt, Iowa.

---

<sup>1</sup>Petitioner became the Licensee of WGEN AM & FM on July 31, 1996, pursuant to BAL-960528GM and BALH-960528GN.

## ***Compliance With Allocation Rules***

2. Attached hereto as ***Exhibit 1***, is the Engineering Statement of Roy P. Stype, III of the Engineering firm of Carl E. Smith. As the attached Engineering Statement demonstrates, the proposed substitution of Channel 285C3 in DeWitt, Iowa for Channel 285A in Geneseo, Illinois will meet all of the spacing requirements set forth in 47 CFR §§73.207 and 73.210. Furthermore, this proposal falls under Sections 1.420(g) and 1.420(I) of the Commission's Rules because the proposed allotment of Channel 285C3 in DeWitt, Iowa is mutually exclusive with the present use of Channel 285A in Geneseo, Illinois. Accordingly, other expressions of interest need not be solicited or entertained by the Staff under current allocation policies.

## ***Community Showing***

3. DeWitt, Iowa is a community of sufficient size, identity, and independence to warrant an allotment of a local broadcast service under the Commission allocation policies. DeWitt is an incorporated city in Clinton County, Iowa. It had, as of the 1990 U.S. Census, a population of 4,514. A city-wide census taken in 1994 revealed that the city's population had increased to 4,963. The *1994 Rand McNally Road Atlas* population figures for Clinton County were 51,040 persons.

4. The history of DeWitt dates back to 1841 when it was known as Vandenburg. It was at that time the Seat of Justice for Clinton County. In 1842, the Iowa Territorial Legislature changed the town's name to DeWitt. In 1858, DeWitt was officially incorporated. As an established historic city, DeWitt is deserving of a first aural service.

5. DeWitt has an elected mayor<sup>2</sup> and city council which are independent of Clinton County government. The city has its own community hospital, fire department, police department, water plant, trash disposal plant, library and community center. According to the

---

<sup>2</sup>The Hon. Leo Maynard is currently Mayor.

DeWitt Chamber of Commerce and Economic Development, there are over twenty-two major employers in DeWitt.<sup>3</sup>

6. In addition, DeWitt has a variety of retail stores, restaurants, service stations and banks. The city has a number of insurance companies, lawyers and a medical center which houses the offices of several physicians. There is an independent city school board which oversees a system of three elementary schools, one middle school, and one high school. Additionally, the community is served by several private preschools and a parochial school. The community also has ten houses of worship. DeWitt also has several service and community organizations. (See Exhibit 2)

7. *Other Media.* DeWitt is presently served by a bi-weekly newspaper, the *DeWitt Observer*, which is published in DeWitt. (See Exhibit 2).

### ***Public Interest Showings***

8. *First Local Service to DeWitt, Iowa.* As stated in the attached Engineering Statement, there are no other aural broadcast facilities in DeWitt. The proposed change in community would serve the new community and provide its first aural service. This new service will promote the Commission's goal of enhancing diversity of thought and opinion in the broadcast media, as well as Congress's charge to the Commission to ensure a fair, efficient and equitable distribution of radio services in the United States.<sup>4</sup>

9. *Maximization of Broadcast Facilities.* Furthermore, under Commission policies, the proposed substitution and upgrade would constitute a preferential arrangement of allotments, and encourage the maximization of broadcast facilities. *See generally, Modification of FM and TV Authorizations to Specify a New Community of License*, 4 FCC Rcd 4870 (1989)

---

<sup>3</sup>See **Exhibit 2**, attached hereto.

<sup>4</sup>47 U.S.C. §307(b)

("Change of Community R&O"), (*recon. granted in part*, 5 FCC Rcd 7094 (1990)) and *Modification of FM and TV Stations Licenses*, 49 FR 34007 (August 28, 1984, at ¶13).

10. *Significant Coverage Gains vs. Minimal Losses.* The proposed reallocation to Channel 285C3 will realize a significant net gain in service coverage area versus loss of service. With the upgrade, the net gain in population would be 196,097 versus a net loss of 12,744.<sup>5</sup> The net gain in area is 2,963 square KM versus 765 square km.<sup>6</sup> Accordingly, the instant proposal is in the public interest because it maximizes the use of the channel allotted.

### ***The Proposal is Consistent with the Commission's Community Change Policies***

11. Neither Geneseo, Illinois nor DeWitt, Iowa is located in an urbanized area. Although DeWitt is near the Davenport-Rock Island-Moline Iowa-Illinois urbanized area, the proposed allotment is not subject to the criteria set forth in *RKO General (KFRC)*, 5 FCC Rcd 3222 (1990) or *Faye and Richard Tuck*, 3 FCC Rcd 5374 (1988).<sup>7</sup> Under the recent decisions of *Walterboro and Ridgeville, South Carolina*, 1996 FCC Lexis 608, MM 93-169 (1996) and *Headland Alabama and Chattahoochee, Florida*, 10 FCC Rcd 10352 (1995), stations seeking to relocate to a community near an urbanized area are required to address facts set forth in *KFRC* and *Tuck* only if the new allotment would place a 70 dBu (3.16 mV/m) signal over the urbanized area. As indicated in the attached Engineering Statement, the predicted 70 dBu contour for WGEN-FM would cover only 46.5% of the urbanized area and 38.1% of the population in that area--less than the 50% criteria established in *Tuck*.<sup>8</sup> Thus, the instant

---

<sup>5</sup> See Engineering Statement (Exhibit 1), Table 1.2.

<sup>6</sup>*Id.*

<sup>7</sup>*See also Change of Community R&O, supra.*

<sup>8</sup>In any event, analysis of the community information provided herein provides ample evidence that the community of DeWitt, Iowa has its own identity and is substantially independent of the urbanized area to the South.

proposal is in compliance with the Commission's Community Change Policies. *Community Change R&O, supra.*

12. *Continued Aural Service to Geneseo.* The instant proposal will not only provide DeWitt with its first local service, but it will not deprive Geneseo of its own local service. WGEN (AM), which would remain licensed to Geneseo. Moreover, not only would the community of Geneseo continue to enjoy local aural service from WGEN (AM), but it also has reception service from at least five or more full-time aural services.<sup>9</sup> In fact, as shown in Figure 1.2 of the Engineering Statement, even after the proposed change in community of license from Geneseo to DeWitt, WGEN-FM would continue to provide primary (1 mV/m) service on Channel 285C3 to all of Geneseo, Illinois.

### ***Statement of Interest in Channel***

13. Petitioner hereby states that, should the Commission institute the requested Rule Making proceedings and ultimately adopt the amendment to the FM Table of Allotments proposed herein, Petitioner will promptly file an application to modify the facilities of WGEN-FM to specify operation on Channel 285C3 and to change its community of license to DeWitt, Iowa.

---

<sup>9</sup>See Engineering Statement (Exhibit 1), p.3.

WHEREFORE, the above premises considered, Petitioner respectfully urges that the Commission INSTITUTE Rule Making proceedings, proposing to AMEND Section 73.202(b) of the Rules, FM Table of Allotments, as follows:

<i>Community</i>	<i>Present</i>	<i>Proposed</i>
Geneseo, Illinois	285A	-----
DeWitt, Iowa	-----	285C3

## ENGINEERING STATEMENT

This engineering exhibit is prepared on behalf of Connoisseur Communications of Quad Cities, L.P., licensee of Radio Station WGEN-FM - Geneseo, Illinois. It supports a petition to amend the FM Table of Allotments to upgrade WGEN-FM to a Class C3 facility and change its community of license to DeWitt, Iowa. The data contained in this exhibit shows that it is possible to substitute Channel 285C3 in DeWitt, Iowa, for Channel 285A in Geneseo, Illinois, for use by WGEN-FM.

The geographic coordinates for DeWitt are:

NL - 41° 49' 30"  
WL - 90° 32' 20"

This places DeWitt within Zone II, as defined by Section 73.205(c) of the FCC Rules. Accordingly, as outlined in Section 73.210(a) of the FCC Rules, the allotment of a Class C3 channel to DeWitt is permitted. The studies contained in this exhibit were conducted from a site 14.2 kilometers south-southeast of DeWitt. The geographic coordinates of this site are:

NL - 41° 42' 50"  
WL - 90° 27' 20"

This site also falls within Zone II, permitting the operation of a Class C3 facility from this site.

Table 1.0 is an FM allocation study for Channel 285C3 from the site described above. An examination of this table shows that operation on Channel 285C3 from this site would be short spaced to the present operation of WGEN-FM on Channel 285A. This short spacing will not pose any problems since this channel will be deleted if Channel 285C3 is allotted to DeWitt, as proposed herein. Furthermore, under the pro-

visions of Sections 1.420(g) and 1.420(i) of the FCC Rules, this conflict with the existing operation of WGEN-FM will permit the license of WGEN-FM to be modified to specify operation on Channel 285C3 in DeWitt, regardless of other expressions of interest which might be received. Pursuant to the rounding provisions of Section 73.208(c)(8) of the FCC Rules, the 141.54 kilometer spacing to WXRX - Belvidere, Illinois, and the 141.55 kilometer spacing to WXCL - Pekin, Illinois, are considered to comply with the required spacing of 142 kilometers.

Figure 1.1 is a map exhibit showing the predicted 3.16 mV/m (city grade) contour for the site specified above for Channel 285C3 in DeWitt. This contour was projected assuming maximum Class C3 facilities of 25 kilowatts effective radiated power at 100 meters above average, assuming uniform terrain. As shown in this figure, it will be possible to provide city grade service to all of DeWitt on Channel 285C3 from a site which will meet all of the spacing requirements to other facilities requiring consideration.

Also shown in Figure 1.1 are the boundaries of the Davenport-Rock Island-Moline, IA-IL, urbanized area. As shown in this figure, the predicted 3.16 mV/m contour for the proposed facilities will cover a portion of this urbanized area. Table 1.1 is a tabulation of the area and population within this urbanized area which will receive 3.16 mV/m service from the proposed upgraded facilities. As shown in this table, The proposed facilities will provide 3.16 mV/m service to 46.5% of the area and 38.1% of the population of this urbanized area. Since this urbanized area coverage falls below the 50% threshold outlined in the Report and Order in MM Docket 91-25 (Headland, Alabama and Chattahoochee, Florida), no showing regarding the independence of DeWitt from this urbanized area is required.

It should be noted that DeWitt (population 4514<sup>1</sup>) presently has no local radio service and is not located within an urbanized area. Thus, the proposal outlined herein would provide DeWitt with its first local service, advancing the FCC's allotment priorities. Furthermore, the deletion of Channel 285A would not deprive Geneseo (population 5990) of its only local service, as WGEN(AM) would remain licensed to Geneseo.

Figure 1.2 is a map exhibit showing the predicted 1 mV/m contour for Channel 285C3 in DeWitt for operation with maximum Class C3 facilities from the coordinates outlined above. This figure also shows the predicted 1 mV/m contour for the present WGEN-FM operating facilities. Both of these contours were projected assuming uniform terrain. Table 1.2 presents detailed data on the present and proposed populations and areas, as well as the loss and gain areas. It should be noted that the entire area encompassed by these contours, including the loss and gain areas, is well served, receiving five or more fulltime aural services.

In summary, Channel 285C3 can be allotted to DeWitt, Iowa, in place of the present allotment of Channel 285A to Geneseo, Illinois, to permit the WGEN-FM operating facilities to be upgraded.

---

<sup>1</sup>All population data in this exhibit is extracted from the 1990 U. S. Census.
